Dry powder and granule filling machine , packaging powder filler

Commodity: dry powder filling machine and powder packaging machine
Powder Packaging Line model is SDL-F500 powder filler granule filling machine

Powder filling machine details:

1. Suitable for measurement and packaging of ultrafine powder material, combines measuring, bag making, sealing, printing and counting with complete automation
2. With measure and fill the powder material by using the servo motor to drive the screw rotation.
3. The system adopts independent mixing and automatic control parts to achieve high efficiency and stable performance
4. Integrated controller to ensure the accurate and stable packaging process

5. It is easy to operation by digital displays
6. Good after sale service

Powder filler specification:

Model	SDL-F500
Length (mm) of the bag	100-550 mm
Width (mm) of the bag	120-290 mm
Width (mm) of Max Film	260-600 mm
Capacity of Packaging (ml)	100-3000 ml
Speed of Packaging (bags/min)	20-60 bags/min
The Power (kw)	4(kw)
The Gas Source (mpa)	0.65 mpa
The Gas Consumption (l/min)	500 l/min
The Overall Dimension (mm)	1180*1890*2750 mm
Weight (kg) of Overall	850 kg
